

Mr. FCC,

I have had xm/radio since the first month it came out, and have watched the improvements it has made. I recently made a trip to the LA area and used the traffic update continually once I reached my destination. Being unfamiliar with their local stations and not to mention the overall traffic I encountered, it helped me out wonderfully! I do not believe you should discontinue the service for the reasons you have come up with.....It will take a lot of convincing to me to want to eliminate. My answer is absolutely NO, NO, NO!!!!!!!

Jim Luis
